

Kitchen Remodeling

PRICE:

As with all of our work, our kitchen remodeling projects are very desirably-priced, and include labor, materials, permits, the hiring of electricians and plumbers if necessary, etc. We are also always happy to provide several different written estimates to you based on different plans, designs and options. We do not believe that a comprehensive renovation and modernization of the kitchen-area is a project that needs to cost a small fortune, or that usually is priced beyond the means of most consumers. We will work with you to find the renovations that will make you happy and which will fit within your budget.

QUALITY:

We understand that the Kitchen is the focal point of most households, and we are familiar with the features and materials that are most desired: center-islands and extra counter-top space options, custom cabinetry, dramatic windows and soft recessed lighting, ceramic tile flooring and countertops, hardwood flooring, beautiful moldings, wallpaper, and creating the 'great room' feel of spaciousness in this most important of living spaces.

We will help you to select the best materials available for your project, and we will follow through with expert installation and careful attention to details.

FAST SERVICE:

In almost all cases, we will come to your location within 24 hours of receiving your email or telephone call for a FREE WRITTEN ESTIMATE. After conducting the site inspection, we follow up immediately with our clear, detailed, "plain language" written estimate. In most cases, work will be started within one week of your acceptance of our proposal. Depending upon how extensive the renovations are and upon the receipt of ordered custom materials, we typically complete these jobs within one to three weeks.
